Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 & 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bollman.

Re claims 1-3, Bollman discloses (column 5, line 54 - column 6, line 26) a digital image processing system in which a document image is received and edges of shapes are manipulated in such a way that they are selectively softened.

Re claim 9, the edge softening process uses a blurring (i.e. spatial low-pass) convolution filter (column 5, lines 60-61).

Re claim 10, look-up tables values are used in the edge softening process (column 5, lines 65-66).

Re claims 11-14, the edge softening process inherently modifies the values of at least some pixels, some to higher values (e.g. the white pixels at the right-hand side of the "soft edge" of Figure 4B) and some to lower values (e.g. the

dark pixels at the left-hand side of the "soft edge" of Figure 4B), creating a gradient (of increasing density of dark pixels from left to right in the "soft edge" of Figure 4B).

Allowable Subject Matter

3. Claims 4-8 & 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claim 4 (and dependent claims 5-8), the art of record does not teach or suggest the recited trapping and tagging operations in conjunction with the claimed selective edge softening arrangement.

Re claim 15, the art of record does not teach or suggest the recited selective dilation, isolation, halftoning, and XOR operations in conjunction with the claimed selective edge softening arrangement.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mantell, Barski et al, Mailloux et al, and Salesin et al disclose additional examples of image edge softening operations.
